

Instrument B — Non-Borrower Comparison Group

AGRISENSO Plus Baseline Study — item-by-item enumerator reference

How to use this. Find the item code on screen, find it here. Question text, options, routing and limits are taken directly from the live questionnaire, so this sheet always matches what the app does.

required — the page will not advance until it is answered. **filled by the app** — do not type over it.

The shaded line under a question gives its routing and any limits the app enforces.

Three rules everywhere. Read the question as written; never suggest an answer; blank is valid for everything except the required items — never enter a filler to move on.

Questionnaire Administration and Quality-Control Information

Questionnaire Administration and Quality-Control Information

REQUIRED

FILLED BY THE APP

Comparison-Group Sampling Frame ID

Enumerator Name / ID

Supervisor Name / ID

Date of Interview

Interview Start Time

Interview End Time

Language Primarily Used:

Filipino · English · Local language/dialect (specify) · Other

Interview Mode:

Face-to-face · Other approved mode (specify)

What it measures. Identifies the interview and links it to the sample. None of it is read aloud.

How to ask it. Complete before greeting the respondent, while you still have signal.

Watch for. The Sampling Frame ID is the only link between this interview and the approved list. Copy it exactly, including dashes and leading zeros. If you cannot find it, leave it blank and call your supervisor rather than inventing one. Use the same spelling of your own name every time.

Introduction and Informed Consent

Consent to Participate REQUIRED

Do you voluntarily agree to participate?

Yes – Proceed · No – End interview and thank respondent

What it measures. The legal basis for the interview. Everything that follows depends on it.

How to ask it. Read the consent script in full, word for word, inserting your own name where indicated. Then ask the question.

Watch for. No ends the interview immediately. Thank the respondent, submit the record so the refusal is counted in the sample disposition, and do not attempt to persuade them.

Consent for Possible Validation / Back-check REQUIRED

A “No” response does not affect participation in this interview.

May the research team contact you again, if necessary, for a brief validation or back-check?

Yes · No

What it measures. Permission for a later validation call or back-check.

How to ask it. Ask plainly, after consent to participate.

Watch for. Say clearly that No here does not affect the present interview. Respondents often assume refusing will end the interview.

Consent Confirmation REQUIRED

Enumerator Attestation

I certify that I read/explained the informed consent and that the respondent voluntarily agreed to participate.

Respondent Signature (optional)

What it measures. Your certification that consent was properly obtained.

How to ask it. You tick the attestation, not the respondent. Offer the signature line; never insist.

Watch for. Only tick it if you genuinely read or explained the consent. A respondent who agreed verbally but will not sign is still a valid interview.

Identification and Eligibility Screening

A1 Location of Interview **REQUIRED**

Region

National Capital Region (NCR) · Cordillera Administrative Region (CAR) · Region I – Ilocos Region · Region II – Cagayan Valley · Region III – Central Luzon · Region IV-A – CALABARZON · MIMAROPA Region · Region V – Bicol Region · Region VI – Western Visayas · Region VII – Central Visayas · Region VIII – Eastern Visayas · Region IX – Zamboanga Peninsula · Region X – Northern Mindanao · Region XI – Davao Region · Region XII – SOCCSKSARGEN · Region XIII – Caraga · Negros Island Region (NIR) · Bangsamoro Autonomous Region in Muslim Mindanao (BARMM)

Province

Municipality/City

Barangay

Island Group:

Luzon · Visayas · Mindanao

What it measures. Where the interview took place.

How to ask it. Pick the region; province, municipality and barangay follow from it where there is signal.

Watch for. Changing the region clears the three fields below it — that is intended. With no signal they stay text boxes; type them exactly as printed on the sampling frame. Island Group fills itself.

A2 Respondent Type **REQUIRED**

Based on the approved comparison-group sampling frame, is the respondent:

Individual respondent · Organizational / enterprise respondent

What it measures. Whether this is an individual or an organisational respondent. Controls the whole interview.

How to ask it. Read it off the approved comparison-group sampling frame.

Watch for. Same consequence as in Instrument A: it opens either the household block or the enterprise block.

A3 Respondent Segment

Respondent Segment

Small Farmer / Fisherfolk (SFF) · Agrarian Reform Beneficiary (ARB) · Farmers and Fisherfolk Cooperative / Association (FFCA) · Agrarian Reform Beneficiary Organization (ARBO) · Barangay Micro Business Enterprise (BMBE) · Small or Medium Enterprise (SME) · Other approved comparison category

What it measures. The comparison-group segment.

How to ask it. Confirm against the frame.

Watch for. Must be consistent with respondent type.

A4 Respondent / Organization Name

Name

Only when A2 Respondent Type = Individual respondent

Name of organization / enterprise

Only when A2 Respondent Type = Organizational / enterprise respondent

What it measures. The respondent's or organisation's name.

How to ask it. Only the field matching the respondent type appears.

A5 Current AGRISENSO Plus Loan Agreement Verification REQUIRED

Does the respondent or organization currently have an AGRISENSO Plus Program loan agreement with LANDBANK?

No – Continue · Yes · Unable to verify

What it measures. Whether the respondent currently has an AGRISENSO Plus loan. A hard gate.

How to ask it. Note the option order: 'No - Continue' comes first, because No is the expected answer here.

Watch for. Yes ends the interview — this person belongs in the borrower sample, not the comparison group. Refer to your supervisor for a replacement.

A6 Previous AGRISENSO Plus Loan Agreement REQUIRED

Has the respondent or organization ever previously had an AGRISENSO Plus Program loan agreement with LANDBANK, including one that has already been fully paid, closed, or terminated?

No – Continue · Yes · Do not know / Unable to verify

What it measures. Whether they have ever had one, including loans already settled. A hard gate.

How to ask it. Read the whole question. 'Previously' includes loans already fully paid, closed or terminated.

Watch for. Yes ends the interview. Respondents often answer No meaning 'not right now' — probe once: 'Kahit matagal na, o bayad na?'

A7 Current AGRISENSO Plus Application Status REQUIRED

Enumerator Note: If Approved but no loan agreement has yet been executed, refer to the supervisor to confirm whether the respondent remains eligible under the final comparison-group protocol.

Are you or your organization currently applying for, or have you previously attempted to apply for, AGRISENSO Plus financing?

Never applied · Made an inquiry but did not formally apply · Started application but did not complete it · Application withdrawn · Application declined / disapproved · Application currently being processed · Approved but no loan agreement has yet been executed · Other

What it measures. Application history. Separates never-applied from tried-and-failed.

How to ask it. Read all options before accepting an answer.

Watch for. Not a gate, but analytically central to the comparison. If the answer is 'Approved but no loan agreement executed', refer to your supervisor before continuing — eligibility depends on the final protocol.

A8 Individual Respondent Eligibility REQUIRED

Is the respondent at least 18 years old?

Yes · No

Only when A2 Respondent Type = Individual respondent

Are you directly involved in decisions concerning your farm, fishery, livelihood, or agriculture-related enterprise?

Yes · No

Only when A2 Respondent Type = Individual respondent

What it measures. Individual eligibility: adult, and involved in decisions. Both are gates.

How to ask it. Individual branch only. Note that in Instrument B these are A8, not A7.

Watch for. Under 18 ends the interview. Not involved in decisions refers to the supervisor.

A9 Organizational / Enterprise Respondent Eligibility REQUIRED

What is your role?

Owner / Proprietor · Chairperson / President · Board Member / Director · Manager · Treasurer / Finance Officer · Other Officer · Authorized Representative · Other

Only when A2 Respondent Type = Organizational / enterprise respondent

Are you authorized or sufficiently knowledgeable to answer questions concerning the organization's: - agricultural or enterprise operations; - financing needs; - current financing sources; - financial practices; and - production or enterprise conditions?

Yes – Continue · No

Only when A2 Respondent Type = Organizational / enterprise respondent

What it measures. Organisational eligibility: role, and whether they can speak for the organisation.

How to ask it. Read the full list: operations, financing needs, current financing sources, finances.

Watch for. 'No' on authorisation stops the interview. Find an authorised officer or book a callback.

A10 Final Eligibility Determination FILLED BY THE APP

What it measures. Final eligibility, computed from the screening answers above.

How to ask it. Do not ask and do not click.

Watch for. If it reads 'Not yet determined', a screening answer above is missing.

Respondent and Household / Organization Profile

B1 Respondent Sex

Respondent Sex

Male · Female · Prefer not to answer

Only when A2 Respondent Type = Organizational / enterprise respondent

Record the sex of the representative only. Do not interpret this as the sex classification of the organization.

Only when A2 Respondent Type = Organizational / enterprise respondent

What it measures. Respondent sex, for disaggregation.

How to ask it. Observe where obvious; ask if unsure.

Watch for. For an organisational respondent this records the representative only. It is not the sex classification of the organisation — say so if the respondent looks puzzled.

B2 Age REQUIRED

Age in completed years

Only when A2 Respondent Type = Individual respondent; between 18 and 120; whole number; in years

Age

18–35 · 36–50 · 51–65 · 66 and above

Only when A2 Respondent Type = Individual respondent

What it measures. Age, and the age band derived from it.

How to ask it. Ask for completed years. Help the respondent work it from a birth year if unsure.

Watch for. Must be 18 or over; the app rejects less. Never leave a stray 0. The age group below fills itself.

B3 Highest Educational Attainment

Highest Educational Attainment

No formal schooling · Elementary level · Elementary graduate · Junior High School / High School level · Junior High School / High School graduate · Senior High School level / graduate · Technical / Vocational · College level · College graduate · Postgraduate · Other · Prefer not to answer

Only when A2 Respondent Type = Individual respondent

What it measures. Educational attainment, a standard correlate of financial capability.

How to ask it. Read the options. Do not infer from appearance or speech.

Watch for. 'Level' means attended but did not finish; 'graduate' means completed. Do not merge them.

B4 Civil Status

Civil Status

Single · Married · Living with partner · Widowed · Separated · Other · Prefer not to answer

Only when A2 Respondent Type = Individual respondent

What it measures. Civil status.

How to ask it. Read the options.

Watch for. 'Living with partner' is distinct from 'Married'. Record what the respondent says, not what is on paper.

B5 Household Size

Total household members (persons)

Only when A2 Respondent Type = Individual respondent; between 1 and 50; whole number; in persons

What it measures. Household size, the denominator for the two questions that follow.

How to ask it. 'Including yourself, how many persons usually live in your household?'

Watch for. Minimum 1, because the respondent counts. 'Usually live' means regular members: include a student who comes home, exclude a long-term overseas worker unless the household treats them as resident.

B6 Economically Active Household Members

Number of adult household members currently earning or engaged in farming, fishing, employment, business, or livelihood (persons)

Only when A2 Respondent Type = Individual respondent; between 0 and 50; whole number; in persons; cannot exceed the answer above

What it measures. How many household members earn, a measure of dependency.

How to ask it. Aged 18 or older, earning income or actively engaged in a livelihood.

Watch for. Cannot exceed household size; the app warns if it does. Zero is a legitimate answer and is not the same as leaving it blank.

B7 Household Dependents

Number primarily dependent on others for financial support (persons)

Only when A2 Respondent Type = Individual respondent; between 0 and 50; whole number; in persons; cannot exceed the answer above

What it measures. How many household members depend on others.

How to ask it. Members primarily dependent on other members for financial support.

Watch for. Cannot exceed household size. This and the previous item need not sum to household size — some members are neither.

B8 Estimated Average Monthly Household Income

Estimated amount: PHP

Only when A2 Respondent Type = Individual respondent; Answering this clears the other answers in this item; 0 or more; in PHP per month

Estimated Average Monthly Household Income

Unable to estimate exact amount · Prefer not to provide exact amount

Only when A2 Respondent Type = Individual respondent; Answering this clears the other answers in this item

If necessary:

Below PHP 10,000 · PHP 10,000–19,999 · PHP 20,000–39,999 · PHP 40,000–59,999 · PHP 60,000–99,999 · PHP 100,000 and above · Do not know · Prefer not to answer

Only when A2 Respondent Type = Individual respondent; Appears once B8 Estimated Average Monthly Household Inc is answered; Answering this clears the other answers in this item

What it measures. Household income, the main welfare measure in the profile.

How to ask it. Ask for the exact average monthly amount first, across all sources and the whole household. Only if that fails, offer the reason, then the bracket.

Watch for. The most refused question in the instrument. Ask it matter-of-factly and move on. Distinguish 'unable to estimate' from 'prefers not to'. If the respondent refuses outright, do not push for a bracket.

B9 Primary Household Livelihood

Primary Household Livelihood

Crop farming · Capture fisheries · Aquaculture · Livestock · Poultry · Agricultural processing · Agricultural trading / marketing · Agricultural wage labor · Non-agricultural employment · Non-agricultural business · Remittances · Pension / retirement income · Other

Only when A2 Respondent Type = Individual respondent

What it measures. The household's main income source, which may differ from the farm enterprise.

How to ask it. Ask for the main source for the household as a whole.

Watch for. A household can farm while its largest income is a pension or remittances. Record what they say.

B10 Indigenous Peoples Identification

Do you identify as a member of an Indigenous Cultural Community / Indigenous Peoples group?

Yes · No · Prefer not to answer

Only when A2 Respondent Type = Individual respondent

If Yes and willing to specify:

Only when A2 Respondent Type = Individual respondent

What it measures. Indigenous Peoples identification, for disaggregation.

How to ask it. Read as written. This is self-identification.

Watch for. Never infer it from language, place or appearance. The follow-up appears only after Yes and stays optional.

B11 Disability Status

Do you identify as a person with disability?

Yes · No · Prefer not to answer

Only when A2 Respondent Type = Individual respondent

What it measures. Disability status, for disaggregation.

How to ask it. Self-identification again.

Watch for. Do not infer from what you observe.

B12 Mobile Phone Access

Do you have regular access to a mobile phone used for communication or financial transactions?

Yes · No

Is the phone:

Own phone · Shared / household phone

Only when B12 Mobile Phone Access = Yes

What it measures. Mobile phone access, a precondition for digital financial services.

How to ask it. Ask about regular access for communication or financial transactions.

Watch for. Access, not ownership. The follow-up separates an own phone from a shared household phone.

B13 Internet / Mobile Data Access

Internet / Mobile Data Access

Regularly · Occasionally · Rarely · No access

What it measures. Internet or mobile data access.

How to ask it. Read all four options.

Watch for. Asked of both individual and organisational respondents. 'Rarely' and 'No access' are different answers.

Farm, Fishery, and Enterprise Profile

C1 Current Agricultural / Enterprise Activities

Current Agricultural / Enterprise Activities

Crop production · Capture fisheries · Aquaculture · Livestock · Poultry · Agricultural processing · Agricultural trading / aggregation · Input supply · Storage / warehousing · Marketing / retail · Transport / logistics · Other

What it measures. The activities the respondent is engaged in. This item controls the whole section.

How to ask it. Read every option before accepting an answer. Select all that apply.

Watch for. The most consequential item in Section C. Production questions appear only for crop, fisheries, aquaculture, livestock or poultry. A trader answers 18 questions here; a mixed farmer answers 52. Every careless extra tick opens another production block.

C2 Principal Commodity / Enterprise Activity

Which of the activities you selected is your principal activity?

Commodity/product

What it measures. The principal activity and commodity, which later questions refer back to.

How to ask it. The dropdown offers only what was ticked above. Ask which is the main activity, not the first mentioned.

Watch for. Be specific on the commodity: 'Palay (rice)', not 'farming'. It carries forward to the production question.

C3 Years in Operation

Response (years)

Answering this clears the other answers in this item; between 0 and 100; in years

Years in Operation

Less than one year

Answering this clears the other answers in this item

What it measures. Experience in the principal activity.

How to ask it. Years engaged in this activity.

Watch for. For under a year, leave the number blank and tick 'Less than one year' instead. The two are alternatives — answering one clears the other.

C4 Farm / Production Area

Total area used for the principal activity

Only for production activities ticked in C1; Answering this clears the other answers in this item; 0 or more

Unit (applies to both areas above)

Hectares · Square meters · Other

Only for production activities ticked in C1; Answering this clears the other answers in this item

Area actually cultivated / utilised during the most recent cycle

Only for production activities ticked in C1; Answering this clears the other answers in this item; 0 or more; cannot exceed the answer above

No land or production area applies to this activity

Not applicable

Only for production activities ticked in C1; Answering this clears the other answers in this item

What it measures. Land or production area, total and actually used.

How to ask it. Numbers only. Choose the unit once; it applies to both areas.

Watch for. Cultivated area cannot exceed total area; the app warns. The difference is fallow or idle land. If no land applies to this activity, tick 'Not applicable' — it clears the area fields.

C5 Land Tenure / Access Arrangement

Land Tenure / Access Arrangement

Owned · Agrarian Reform Beneficiary / awarded land · Rented / leased · Tenant / share arrangement · Shared / communal · Borrowed / permitted use · Other · Not applicable

Only for production activities ticked in C1

What it measures. How land is held or accessed.

How to ask it. Select all that apply.

Watch for. Several can be true at once: owned plus rented is common.

C6 Production Scale

Production Scale

Rows: Crops · Fisheries / Aquaculture · Livestock · Poultry · Other

Columns: Activity · Area / Number · Unit / Classification

Only for production activities ticked in C1

What it measures. Scale of production, in commodity-appropriate units.

How to ask it. Fill only the rows matching the reported activities.

Watch for. Leave irrelevant rows empty rather than writing N/A in them.

C7 Production During Most Recent Completed Cycle

Commodity

Only for production activities ticked in C1

Production volume

Only for production activities ticked in C1; 0 or more

Unit:

Kilograms · Metric tons · Cavans / sacks · Pieces · Heads / birds · Liters · Other

Only for production activities ticked in C1

Estimated yield per hectare where applicable

Only for production activities ticked in C1; 0 or more

What it measures. Output in the most recent completed cycle.

How to ask it. Commodity carries forward; edit only if this cycle differed. Record volume and match the unit to it.

Watch for. Cavans and kilograms are not interchangeable — record the unit the respondent actually used. Yield per hectare applies only where it is meaningful; skip it for livestock, poultry and enterprises.

C8 Number of Production Cycles

Past 12 months (cycles)

Only for production activities ticked in C1; Answering this clears the other answers in this item; between 0 and 24; in cycles

Number of Production Cycles

Continuous production · Not applicable

Only for production activities ticked in C1; Answering this clears the other answers in this item

What it measures. Production intensity over the year.

How to ask it. Completed cycles in the past 12 months.

Watch for. For continuous operations leave the number blank and tick 'Continuous production'. Livestock and poultry are often continuous.

C9 Irrigation / Water Source

Irrigation / Water Source

Irrigation system · Pump / groundwater · Rainfed · River / stream · Farm pond / reservoir · Other · Not applicable

Only for production activities ticked in C1

What it measures. Water source, a key production constraint.

How to ask it. Ask for the principal source only.

Watch for. Shown only for crop production and aquaculture.

C10 Mechanization / Equipment

Did you use machinery or mechanized equipment?

Yes · No · Not applicable

Only for production activities ticked in C1

Mechanization / Equipment

Land preparation · Planting · Irrigation · Harvesting · Post-harvest · Processing · Fisheries/aquaculture · Livestock/poultry · Transport/hauling · Other

Only when C10 Mechanization / Equipment = Yes; Only for production activities ticked in C1

Mode of access:

Owned · Rented · Borrowed/shared · Cooperative-provided · Government-supported · Other

Only when C10 Mechanization / Equipment = Yes; Only for production activities ticked in C1

What it measures. Mechanisation and how equipment is obtained.

How to ask it. Ask whether machinery was used this cycle; the follow-ups open on Yes.

Watch for. Mode of access is the main one. Rented and borrowed are different arrangements.

C11 Major Production Inputs

Major Production Inputs

Seeds / planting materials · Fertilizer · Pesticides / crop protection · Feeds · Fingerlings / fry · Breeding stock / animals · Veterinary / animal-health inputs · Fuel · Hired labor · Packaging · Other

Only for production activities ticked in C1

What it measures. Inputs used, an indicator of intensification.

How to ask it. Select all that apply.

C12 Extension / Technical Support

During the past 12 months, did you receive extension or technical support?

Yes · No

Extension / Technical Support

Production technology · Fisheries/aquaculture · Livestock/poultry · Mechanization · Post-harvest/processing · Marketing / market linkage · Enterprise development · Digital/technology support · Other

Only when C12 Extension / Technical Support = Yes

Provider:

DA / attached agency · LGU · Cooperative / association · Financial institution · Private sector · NGO / development partner · Other

What it measures. Extension and technical support received.

How to ask it. Past 12 months, any agricultural, fisheries, enterprise or technical support.

Watch for. More than one provider is common; the provider question takes several answers.

C13 Production / Operating Cost

Estimated total for most recent cycle/period PHP

Answering this clears the other answers in this item; 0 or more; in PHP

Production / Operating Cost

Unable to provide exact amount · Prefer not to answer

Answering this clears the other answers in this item

What it measures. Production or operating cost for the reference cycle.

How to ask it. Ask for the exact peso amount first. Prompt for the components — seeds, fertiliser, labour, fuel — if the respondent hesitates. Only if that fails, offer the reason, then the bracket.

Watch for. If you tap a fallback by mistake, the amount box stays open and answering it clears the fallback.

C14 Gross Sales / Revenue

Estimated gross sales/revenue during same period PHP

Answering this clears the other answers in this item; 0 or more; in PHP

Gross Sales / Revenue

Unable to estimate · Prefer not to answer

Answering this clears the other answers in this item

What it measures. Gross sales or revenue for the same period, before expenses.

How to ask it. Ask for the exact amount first, same reference period as the cost.

Watch for. Say 'before expenses' clearly. Respondents frequently give a net figure here, which makes the three money questions inconsistent.

C15 Estimated Net Income / Profit

PHP

Answering this clears the other answers in this item; in PHP

Estimated Net Income / Profit

Break-even · Net loss · Unable to estimate · Prefer not to answer

Answering this clears the other answers in this item

What it measures. Net income or profit for the same period.

How to ask it. After deducting production or operating expenses.

Watch for. The field accepts a negative number. Record a loss as a negative figure, never as 0 — zero reads as break-even, which is a different finding. Sanity-check it against the cost and sales figures above.

C16 Record Keeping

Record Keeping

Yes, regularly · Yes, occasionally · No

Record Keeping — select all that apply

Notebook / ledger · Receipts / invoices · Spreadsheet/computer · Mobile/digital · Formal bookkeeping/accounting · Other

Only when C16 Record Keeping = Yes, regularly or Yes, occasionally

What it measures. Record-keeping practice.

How to ask it. Ask whether records are kept, then how.

Watch for. Several methods can be true at once. Should be consistent with the record-keeping practice question in the financial capability section.

C17 Output Disposition

Output Disposition

Rows: Sold · Consumed by household / members · Retained as seed/input/feed · Given away / other use · Lost / spoiled / wasted · Total

Columns: Use · Approximate %

Only for production activities ticked in C1

Output Disposition

Unable to estimate · Not applicable

Only for production activities ticked in C1

What it measures. Where output went, as percentages.

How to ask it. Read the five uses. Enter a percentage for each.

Watch for. The Total is computed for you and should reach 100. Enter 0 for a category with no output — leaving it blank is not the same as zero.

C18 Production / Post-Harvest Losses

Production / Post-Harvest Losses

Yes · No · Not applicable

Only for production activities ticked in C1

Approximate proportion lost (%)

Only when C18 Production / Post-Harvest Losses = Yes; Only for production activities ticked in C1; between 0 and 100; in %

Main reason

Only when C18 Production / Post-Harvest Losses = Yes; Only for production activities ticked in C1

What it measures. Production and post-harvest losses.

How to ask it. Ask whether losses occurred; the follow-ups open on Yes.

Watch for. Record the proportion lost as a percentage and the main reason in the respondent's own words.

C19 Main Buyers / Market Outlets

Main Buyers / Market Outlets

Local trader / consolidator · Cooperative / association · Wholesaler · Processor · Institutional buyer · Retailer · Direct-to-consumer · Government-supported market · Export · Online/digital platform · Other

What it measures. Where output is sold.

How to ask it. Select all that apply.

C20 Value-Chain Participation

Value-Chain Participation

Input supply · Production · Aggregation · Storage · Processing · Trading · Marketing · Retail · Transport/logistics · Other

What it measures. Which value-chain stages the respondent operates in.

How to ask it. Select all that apply.

Watch for. Most smallholders are production only. Do not over-tick: involvement means they actually do that stage.

C21 Major Shocks During Past 12 Months

Major Shocks During Past 12 Months

Typhoon / severe storm · Flood · Drought / insufficient water · Extreme heat · Pest / disease outbreak · Livestock/poultry disease/mortality · Fisheries/aquaculture losses · Input-price increase · Decline in selling prices · Difficulty accessing markets · Damage to equipment/facilities · Other · None

Which shock had the greatest effect?

Typhoon / severe storm · Flood · Drought / insufficient water · Extreme heat · Pest / disease outbreak · Livestock/poultry disease/mortality · Fisheries/aquaculture losses · Input-price increase · Decline in selling prices · Difficulty accessing markets · Damage to equipment/facilities · Other

Only when C21 Major Shocks During Past 12 Months includes a listed answer

Main effect of the most significant shock

Reduced production · Increased costs · Reduced sales/revenue · Loss of assets · Difficulty meeting financial obligations · Need for additional financing · Temporary interruption · Other

Appears once C21 Major Shocks During Past 12 Months is answered

What it measures. Shocks experienced, which one hurt most, and its effect.

How to ask it. Read every option. Select all that apply, then ask which had the greatest effect.

Watch for. 'None' clears the other ticks automatically. The greatest-effect question offers only what was ticked, so answer the first part properly.

C22 Selected Risk-Management Practices

Selected Risk-Management Practices

Diversification · Adjusted planting/production schedule · Water conservation / management · Climate-resilient varieties/breeds · Protective structures · Improved drainage · Savings / emergency fund · Insurance · Other · None

What it measures. Risk-management practices currently used.

How to ask it. Select all that apply.

Watch for. 'None' clears the others.

C23 Agricultural / Enterprise Insurance

Do you currently have relevant insurance?

Yes · No

Only for production activities ticked in C1

Type — select all that apply

Crop · Livestock · Fisheries/aquaculture · Property/equipment · Other

Only when C23 Agricultural / Enterprise Insurance = Yes; Only for production activities ticked in C1

Provider — select all that apply

PCIC · Private insurer · Cooperative/mutual · Other

Only when C23 Agricultural / Enterprise Insurance = Yes; Only for production activities ticked in C1

Have you filed a claim?

Yes · No

Only when C23 Agricultural / Enterprise Insurance = Yes; Only for production activities ticked in C1

Agricultural / Enterprise Insurance

Fully paid · Partially paid · Pending · Denied · Other

Only when C23 Agricultural / Enterprise Insurance = Yes; Only for production activities ticked in C1

What it measures. Insurance cover, type, provider and claims experience.

How to ask it. Ask whether any cover exists; the follow-ups open on Yes.

Watch for. 'Do not know' is a valid answer for the provider. Claim outcome appears only if a claim was filed.

AGRISENSO Plus Awareness and Application Experience

D1 Awareness of AGRISENSO Plus

Before this interview, had you heard of AGRISENSO Plus?

Yes · No · Not sure

What it measures. Whether the respondent had heard of the programme at all. A key comparison measure.

How to ask it. Ask before explaining anything about AGRISENSO Plus.

Watch for. Explaining the programme first contaminates this answer. Ask it, record it, then explain if they ask.

D2 Source of Program Information

How did you first hear about AGRISENSO Plus?

LANDBANK · ACPC / DA · Cooperative / association · LGU / agriculture office · Barangay officials · Orientation / meeting · Social media / internet · Radio / television · Printed material · Other farmers/fisherfolk/entrepreneurs · Family / friends · Other

What it measures. How they first heard of it, where they had.

D3 Self-Assessed Understanding

How confident are you that you understand how AGRISENSO Plus works?

What it measures. Self-assessed understanding of the programme.

How to ask it. Explain the 1 to 5 scale once.

Watch for. Someone who has never heard of it may still rate low rather than leave it blank; both are acceptable.

D4 Awareness of Program Features

Were you aware of:

Rows: Who may qualify · Eligible financing activities · Loan amount / ceiling · Interest / financing cost · Loan term · Grace period · Documentary requirements · Repayment requirements · Where/how to apply

Columns: Feature · Yes · No · Not Sure

What it measures. Awareness of specific programme features.

How to ask it. Each feature, yes, no or not sure.

Watch for. 'Not sure' is a real answer here.

D5 Application Experience

Have you ever attempted to apply for AGRISENSO Plus?

Yes · No

What happened?

Started but did not complete · Submitted application; still pending · Application withdrawn · Application declined/disapproved · Approved but no loan agreement executed · Other

Only when D5 Application Experience = Yes

What it measures. Whether they ever attempted to apply, and what happened.

How to ask it. The outcome question opens on Yes.

Watch for. Must be consistent with the application-status answer in the screening section.

D6 Reason for Declined Application

If declined: Were you told the reason?

Yes · No · Do not recall

Only when D5 Application Experience = Application declined/disapproved

Reason for Declined Application

Eligibility requirements · Incomplete documents · Repayment-capacity concern · Existing indebtedness / credit issue · Collateral / security · Co-maker/guarantor · Enterprise/activity did not qualify · Information could not be verified · Other

Only when D6 Reason for Declined Application = Yes

What it measures. For declined applications: whether a reason was given, and what it was.

How to ask it. Ask for the reason they were told, not their own theory.

Watch for. If they were never told, the first question is No and you stop there.

D7 Reason for Withdrawal / Incomplete Application

Reason for Withdrawal / Incomplete Application

Difficult documentary requirements · Process took too long · Travel/distance · Process difficult to understand · No longer needed financing · Obtained financing elsewhere · Concern about repayment · Loan terms/amount did not meet need · Application-related costs · Lack of ID/documentation · Digital application difficulty · Language/communication difficulty · Other

What it measures. Reason for withdrawing or not completing an application.

Current Financing Needs, Sources, and Access Barriers

E1 Current Need for Financing

Do you or the organization currently need additional financing for the farm, fishery, or enterprise?

Yes · No · Not sure

What it measures. Whether financing is currently needed.

Watch for. 'Not sure' is allowed and is not the same as No.

E2 Purpose of Current / Anticipated Financing Need

If Yes or Not sure, select all that apply.

Inputs · Labor · Land preparation · Irrigation · Livestock / poultry / aquaculture inputs · Machinery/equipment · Production expansion · Post-harvest/storage · Processing/value addition · Working capital · Transport/logistics · Marketing · Diversification · Other

What it measures. What the financing would be for.

How to ask it. Select all that apply.

Watch for. Asked where the need is Yes or Not sure.

E3 Estimated Financing Need

Approximately how much financing would currently be needed? PHP

Answering this clears the other answers in this item; 0 or more; in PHP

Estimated Financing Need

Unable to estimate · Prefer not to answer

Answering this clears the other answers in this item

What it measures. How much financing is needed.

How to ask it. Ask for the exact peso amount first.

Watch for. The amount needed, not the amount they expect to be able to get.

E4 Current Financing Sources

During the past 12 months, which sources have you used?

Own savings / retained earnings · LANDBANK loan other than AGRISENSO Plus · Other commercial bank · Rural/cooperative bank · Cooperative credit · Microfinance institution · Other government financing program · Informal lender · Trader/buyer advance · Input supplier credit · Family/friends · Digital/online lender · Grant/financial assistance · Other · No external financing used

What it measures. Financing sources actually used in the past 12 months.

How to ask it. Read every option and select all that apply.

Watch for. Informal sources — traders, input suppliers, family — are easy to under-report. Read them out. 'No external financing used' is a real and important answer.

E5 Primary Financing Source

Which was your main financing source?

What it measures. The main financing source among those used.

E6 Adequacy of Current Financing

Does your current financing fully meet your farm/fishery/enterprise needs?

Fully · Partly · No · Not applicable / no financing used

What it measures. Whether current financing meets their needs.

E7 Reason for Not Availing AGRISENSO Plus

What is the main reason you do not currently have an AGRISENSO Plus loan agreement?

Was not aware of Program · Do not know how/where to apply · Do not currently need financing · Prefer own funds · Prefer another source · Do not believe I/we qualify · Could not meet requirements · Concern about repayment/debt · Process appears difficult · Lending office too far/inconvenient · Application pending · Previous application declined · Previous application withdrawn/incomplete · Other

What it measures. Why they do not have an AGRISENSO Plus loan. Central to the whole study.

How to ask it. Ask for the main reason.

Watch for. Do not accept a vague answer — probe once. This is the question the comparison group exists to answer.

E8 Barriers to Formal Agricultural Financing

Which of the following make access difficult?

Lack of information · Do not know where/how to apply · Documentary requirements · Lack of IDs · Eligibility requirements · Collateral/security · Co-maker/guarantor · Distance · Travel costs · Processing/application costs · Long processing time · Complex procedures · Digital platform difficulty · Limited digital literacy · Connectivity · Language/communication · Interest/financing cost · Concern about repayment · Previous negative experience · Preference for informal/familiar source · Other · None

What it measures. Barriers to formal agricultural financing. Feeds the next question.

How to ask it. Read all twenty-one options. Select all that apply.

Watch for. The longest select-all in either instrument, and worth the time. 'None' clears the others.

E9 Most Significant Barrier

Most Significant Barrier

No significant barrier

Only when E8 Barriers to Formal Agricultural Financing includes a listed answer

What it measures. Which barrier matters most.

How to ask it. The list shows only what was ticked above.

Watch for. If it says to answer the previous question first, go back.

E10 Perceived Ease of Formal Financing Access

Perceived Ease of Formal Financing Access

Very difficult · Difficult · Neither difficult nor easy · Easy · Very easy · Never tried / cannot assess

What it measures. Overall perceived ease of access to formal financing.

Financial Knowledge and Capability

Financial Knowledge and Capability

Use the same response scales and wording as the Borrower Survey to support valid comparison.

What it measures. Scope note: this block is worded to match the Borrower Survey exactly.

How to ask it. Do not reword anything in this section.

Watch for. The wording is identical to Instrument A so borrowers and non-borrowers can be compared directly.

F1 Understanding Financing Terms

Confidence in understanding interest, loan term, repayment schedules, grace periods, and fees:

What it measures. Confidence in understanding financing terms.

How to ask it. Explain the 1 to 5 scale once here, and do not re-explain it at every following scale.

Watch for. No N/A — leave blank if the respondent will not answer.

F2 Comparing Financing Options

Confidence in comparing financing options:

What it measures. Confidence in comparing financing options.

F3 Preparing a Budget

Confidence in preparing a simple farm/enterprise budget:

What it measures. Confidence in preparing a budget.

F4 Understanding Cost of Borrowing

Confidence in understanding how interest, duration, and charges affect repayment:

What it measures. Confidence in understanding the cost of borrowing.

F5 Assessing Repayment Capacity

Confidence in assessing whether expected income can meet repayments:

What it measures. Confidence in assessing repayment capacity.

F6 Repayment Planning

Confidence in planning repayment against expected income/production cycles:

What it measures. Confidence in planning repayment.

F7 Separation of Household and Enterprise Finances

Separation of Household and Enterprise Finances

Always · Often · Sometimes · Rarely · Never

Only when A2 Respondent Type = Individual respondent

What it measures. Whether enterprise and household money are kept separate.

How to ask it. Individual branch only.

F8 Budgeting Practice

Budgeting Practice

Always · Often · Sometimes · Rarely · Never

What it measures. Budgeting practice.

How to ask it. How often.

Watch for. Practice, not confidence.

F9 Record-Keeping Practice

Record-Keeping Practice

Always · Often · Sometimes · Rarely · Never

What it measures. Record-keeping practice.

How to ask it. How often.

Watch for. Should be consistent with the record-keeping answer in Section C.

F10 Repayment Planning Practice

Ask respondents with borrowing experience. Before borrowing, do you normally identify where repayment funds will come from and when they will be available?

Yes, clearly · Partly · No · Have never borrowed / Not applicable

What it measures. Whether repayment is normally planned before borrowing.

How to ask it. Ask only of respondents with borrowing experience.

Watch for. Skip it for someone who has never borrowed from any source.

F11 Savings / Financial Buffer

Savings / Financial Buffer

Regularly · Occasionally · No

Savings are set aside mainly for:

Emergency needs · Production costs · Operating costs · Loan repayment · Equipment · Expansion/investment · Disaster/production shocks · Other

Only when F11 Savings / Financial Buffer = Regularly or Occasionally

What it measures. Savings behaviour and purpose.

How to ask it. The purpose question opens only for 'regularly' or 'occasionally'.

F12 Digital Financial Services

During the past 12 months, have you used:

Rows: Mobile banking · Digital wallet · Digital payment to supplier/worker · Digital receipt of payment · Online bank transfer · Online/digital loan application

Columns: Service · Yes · No

Difficulties experienced with digital financial services

Connectivity · Device access · Limited digital skills · Difficult platform · Fraud/security concerns · Privacy concerns · Fees · Language/comprehension · Prefer face-to-face · Other

What it measures. Use of digital financial services, and difficulties with them.

F13 Training / Advisory Support

During the past 12 months:

Financial literacy / management · Budgeting / bookkeeping · Loan orientation / responsible borrowing · Farm/fishery management · Enterprise management · Marketing · Production technology · Digital finance · Other · None

What it measures. Training or advisory support received.

How to ask it. 'None' closes the provider and usefulness questions.

F14 Training Provider

Training Provider

ACPC / DA · LANDBANK · Other financial institution · LGU · Cooperative / association · Other government agency · Private sector · NGO / development partner · Training institution · Other

Only when F13 Training / Advisory Support includes a listed answer

What it measures. Who provided the training.

How to ask it. Select all.

F15 Usefulness of Training

Usefulness of Training

Not at all useful · Slightly useful · Moderately useful · Very useful · Extremely useful

Only when F13 Training / Advisory Support includes a listed answer

Have you applied what you learned?

Yes · Partly · No · Too early to assess

Only when F13 Training / Advisory Support includes a listed answer

What it measures. Usefulness, and whether anything was applied.

F16 Financing and Enterprise Decision-Making

Financing and Enterprise Decision-Making

Rows: Whether to apply for financing · How borrowed funds would be used · Major investments · Marketing/buyer decisions · Major expenditures

Columns: Decision · Respondent · Spouse/Partner · Jointly · Other Household Member · Organization · Other

Only when A2 Respondent Type = Individual respondent

Financing and Enterprise Decision-Making

Rows: Applying for financing · Use of borrowed funds · Major investments · Marketing/buyer decisions · Major expenditures

Columns: Decision · Owner/Proprietor · Manager · Officers · Board · Members / GA · Joint/Other

Only when A2 Respondent Type = Organizational / enterprise respondent

What it measures. Who decides on financing and enterprise matters.

How to ask it. Only the version matching the respondent type appears.

F17 Overall Financial-Management Confidence

Overall Financial-Management Confidence

What it measures. Overall financial-management confidence.

How to ask it. The closing scale.

Perceptions of AGRISENSO Plus and Agricultural Financing

G1 Potential Benefit of Affordable Formal Financing

What would be the most important potential benefit?

Ability to purchase inputs on time · Increased working capital · Ability to acquire equipment · Ability to expand production/business · Reduced reliance on informal lenders · More predictable financing cost · Processing/value addition · Improved market access · Greater financial stability · Other · No significant benefit · Not sure

What it measures. The most important benefit affordable formal financing would bring.

How to ask it. This is hypothetical — what it would achieve, not what they already have.

G2 Perceived Fairness of Access

Do qualified farmers, fisherfolk, organizations, and agri-enterprises in your area generally have a fair opportunity to access formal agricultural financing?

Definitely no · Probably no · Not sure · Probably yes · Definitely yes

Why?

What it measures. Whether access in their area is perceived as fair.

How to ask it. About qualified people in their community, not about themselves.

Watch for. The 'why' answer is valuable free text; give it time.

G3 Trust in Government-Supported Agricultural Financing

How much confidence do you have in government-supported agricultural financing programs?

No confidence · Low confidence · Moderate confidence · High confidence · Very high confidence · Not familiar enough to assess

Why?

What it measures. Trust in government-supported agricultural financing.

How to ask it. Ask neutrally.

Watch for. Do not defend the programme if the answer is negative. You are recording a perception, not correcting it.

G4 Perceived Differences Between Borrowers and Non-Borrowers

Based on what you observe, what most distinguishes farmers, fisherfolk, organizations, or enterprises that are able to obtain formal agricultural financing from those that are not?

Better access to information · Better financial records · Larger farm/enterprise · Cooperative/organizational membership · Better ability to meet requirements · Stronger repayment capacity · Previous relationship with financial institutions · Greater confidence in borrowing · Better digital access/capability · Other · Cannot assess

What it measures. What the respondent observes distinguishes those who get financing from those who do not.

How to ask it. Let them think before answering.

Watch for. The single most insightful question in Instrument B. Do not rush it or offer examples.

Future Financing Intentions and Suggestions

H1 Future Interest in AGRISENSO Plus

If you need financing and are eligible, how likely are you to apply for AGRISENSO Plus in the future?

Very unlikely · Unlikely · Not sure · Likely · Very likely

Why?

What it measures. Likelihood of applying in future.

How to ask it. If in need and eligible.

H2 What Would Encourage Application?

What Would Encourage Application?

More information · Clearer eligibility requirements · Assistance with documents · Simpler application procedures · Faster processing · More accessible application points · Digital/online option · Digital assistance · More suitable loan amount · More suitable repayment terms · Greater confidence in repayment capacity · Cooperative/association assistance · Other

What it measures. What would encourage them to apply.

How to ask it. Select all that apply.

H3 Preferred Information Channels

How would you prefer to receive information about AGRISENSO Plus?

LANDBANK · ACPC / DA · LGU agriculture offices · Cooperative/association · Barangay/community meeting · SMS/text · Facebook/social media · Printed materials · Radio/television · Other

What it measures. How they would prefer to receive programme information.

How to ask it. Select all that apply.

Watch for. Directly useful to programme design. Do not rush it.

H4 Most Significant Financing Challenge

What is the single most significant challenge you currently face in obtaining agricultural financing?

What it measures. The single most significant financing challenge, in their own words.

How to ask it. Open text. Do not lead.

H5 Most Important Improvement to AGRISENSO Plus

What is the one most important improvement you would recommend?

Improve information dissemination · Clarify eligibility/loan terms · Assist with documents · Simplify procedures · Reduce processing time · Improve application accessibility · Improve digital options · Provide digital assistance · Review financing amount · Review repayment terms · Strengthen capacity building · Improve coordination with cooperatives/LGUs · Other

Why?

What it measures. The one most important improvement they would recommend.

How to ask it. Push gently for one, not a list.

H6 Additional Support Needed

Aside from financing, what support would be useful?

Production / technical training · Financial-management training · Bookkeeping / record keeping · Enterprise/business management · Market information · Market linkage · Post-harvest support · Processing/value addition · Technology / mechanization · Digital-finance support · Insurance / risk management · Cooperative / organizational strengthening · Other · None identified

What it measures. Non-financial support that would be useful.

How to ask it. Select all that apply.

H7 Additional Comments

Is there anything else you would like ACPC to know about your financing needs, difficulties in accessing agricultural credit, or AGRISENSO Plus?

What it measures. Anything else the respondent wants ACPC to know.

How to ask it. Give them time. Do not fill the silence.

Enumerator Final Review

Enumerator Final Review

Confirm:

Respondent has no current AGRISENSO Plus loan agreement. · Respondent has never previously had an AGRISENSO Plus loan agreement. · Individual versus organizational routing was followed. · Application-history routing was followed correctly. · Common borrower/comparison questions used the same definitions and reference periods. · Commodity-appropriate units were used. · Exact monetary estimates were requested first where applicable. · Missing or refused responses were properly coded. · Questionnaire was checked for completeness.

What it measures. Your own completeness check before submitting.

How to ask it. Work through the nine points after the interview ends.

Watch for. Tick only what you actually did. It exists to catch your own omissions, not as a formality.

QC1 Interview Outcome

Record how this interview actually ended. Complete this only after the respondent interview is finished.

Interview Outcome

Completed · Partially completed · Callback required · Respondent refused · Respondent unavailable · Respondent ineligible · Other

Callback date

Only when QC1 Interview Outcome = Callback required or Respondent unavailable

Callback time

Only when QC1 Interview Outcome = Callback required or Respondent unavailable

Callback arrangement / reason

Only when QC1 Interview Outcome = Callback required or Respondent unavailable

What it measures. How the interview actually ended. Builds the sample disposition.

How to ask it. Complete after the interview, not before.

Watch for. 'Completed' only if you reached the last section and asked every applicable question. 'Callback required' and 'Respondent unavailable' open the callback date, time and notes.

QC2 Post-Interview Quality Control

These fields are maintained by the field supervisor and the data manager after submission. Leave them at their default values — the enumerator does not verify their own interview.

Supervisor Verification

Pending · Completed

Data Verification Status

Pending verification · Verified

Back-check Status

Not yet selected · Selected for back-check · Completed · Unable to complete · Not selected

What it measures. Post-interview quality control, owned by the supervisor and data manager.

How to ask it. Leave every field at its default.

Watch for. An enumerator marking their own interview verified defeats the control. The supervisor changes these, not you.

Enumerator Observation / Interview Notes

Enumerator Observation / Interview Notes

Record objective conditions only.

No significant issue · Interview interrupted · Other persons present · Difficulty recalling information · Difficulty understanding questions · Interview completed in more than one session · Some questions incomplete · Language / communication difficulty · Other

Brief factual notes:

What it measures. Objective conditions that may bear on data quality.

How to ask it. Complete immediately after the interview, while it is fresh.

Watch for. Facts, not impressions. 'Respondent consulted loan documents' is useful; 'seemed evasive' is not. Tick 'No significant issue' if nothing occurred.

Closing Statement

Closing Statement

Thank you very much for your time and for sharing your experience and views. The information you provided will form part of the AGRISENSO Plus Baseline Study and will help ACPC better understand the agricultural financing needs and access conditions of individuals and organizations that have not availed themselves of AGRISENSO Plus financing. Your responses will be handled in accordance with the confidentiality and data-protection arrangements explained at the beginning of the interview.

End Time

What it measures. The closing statement and the automatic end time.

How to ask it. Read the closing statement before putting the device away.

Watch for. Thank the respondent, confirm what happens next, and answer any questions about the study.
